

db x-trackers II IBOXX SOVEREIGNS EUROZONE YIELD PLUS UCITS ETF
Share Class: 1C (ISIN: LU0524480265), (WKN: DBX0HM), (Currency: EUR)

a sub fund of db x-trackers II. The Fund is managed by Deutsche Asset Management S.A., part of the Deutsche Bank Group.

Objectives & Investment Policy

The aim is for your investment to reflect the performance of the Markit iBoxx EUR Sovereigns Eurozone Yield Plus Index® (Index).

The Index reflects the performance of tradable debt (bonds) denominated in Euro issued by Eurozone governments. Only bonds issued by the 5 highest-yielding Eurozone countries will be eligible for inclusion in the Index, with the exception of the two countries with the highest GDP (as determined in October each year), unless one such country is the highest yielding Eurozone country at each monthly rebalancing of the Index.

To be included in the Index, countries must, 5 days before the end of the relevant month, have at least two bonds in the 1 year - 10 year maturity band of the Markit iBoxx EUR universe. The highest yielding countries are determined by calculating the income return

(yield) of a hypothetical bond with a maturity of exactly 5 years. Issuers with a sub-investment grade rating are excluded from the Index.

The Index is calculated on a total return basis, which means that amounts equivalent to interest payments on the bonds are reinvested in the Index. The Index is reviewed and re-balanced monthly and is sponsored by Markit Indices Limited.

To achieve the aim, the Fund will buy bonds and/or invest in cash deposits and enter into financial contract(s) (derivative(s)) with Deutsche Bank relating to the bonds/deposits and a portfolio of financial instruments aimed at replicating the performance of the Index, in order to obtain the return on the Index.

No dividends will be paid on your shares.

You may redeem your investment on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 4 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund does not invest directly in the components of the Index and its returns will be dependent on the performance of the bonds and/or cash deposits and the performance of the derivatives used.

The Fund will enter into a derivative with a counterparty (initially Deutsche Bank). If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

Deutsche Bank and its related companies may act in several roles in relation to the Fund such as distributor, derivative counterparty and management company which may involve conflicts of interest.

The Fund may invest in bonds the value of which depends on the issuer being able to make its payments. There is always a risk that the issuer will fail to do so which may result in your investment suffering a loss.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Index provides a notional exposure to the value and/or return of certain bonds which may fall. Markets in these assets classes may at times become volatile or illiquid. This means that ordinary trading activity may occasionally be disrupted or impossible. The relevant indices may be affected.

Fluctuations in interest rates of the currency of the shares, the Index or the other assets of the Fund may affect the value of your investment.

The Fund follows a rules-based strategy which will deviate from how the overall market or parent index performs. Your investment is likely to be less diversified and there is no guarantee that the index's 'rules-based' strategy will be achieved.

Bonds are exposed to credit risk and interest rate risk. Credit risk means that there is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. Interest rate risk means that if interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser or distributor.†
Entry charge*	3.00%	
Exit charge*	3.00%	
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).		The ongoing charges figure is based on expenses for the year ending October 2016. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.
Charges taken from the Fund over a year		
Ongoing charges	0.15%	
Charges taken from the Fund under certain specific conditions		More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.
Performance fee	None	
		* or EUR 10,000 whichever is the higher.

[†]Entry and exit charges will only apply when shares are subscribed or redeemed directly from the Fund, and will not apply when investors buy or sell such shares on stock exchanges. Investors dealing on exchange will pay fees charged by their stock brokers. Such charges can be obtained from stock brokers. Authorised participants dealing directly with the Fund will pay related transaction costs.

Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2010 and the share class was launched in 2010.

Past performance has been calculated in EUR.
