Asset Management

Deutsche Invest I China Bonds, a sub-fund of the SICAV Deutsche Invest I

Share class USD LC Security code: DWS06M ISIN: LU0616856422

Management Company: Deutsche Asset Management S.A., a member of the Deutsche Bank Group.

Objectives and investment policy

The objective of the investment policy is to achieve sustained capital appreciation. In order to achieve this, the fund invests primarily in government bonds from Chinese and international issuers denominated in or hedged against the Renminbi, as well as in demand deposits. Investments in Renminbi-denominated securities will be made via Renminbi offshore markets as well as the Chinese onshore market. The selection of individual investments is at the discretion of the fund management. The currency of the sub-fund is USD, the currency of the share class is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 3 because its share price fluctuates comparatively little and the likelihood of both losses and gains is therefore relatively low. The following risks could be of particular significance for the fund. These risks can impair the performance of the fund and thus impact negatively on the net asset value per unit and on the capital invested by the investor. The unit value may at any time fall below the purchase price paid by the client.

The fund invests in the People's Republic of China. Investments in the People's Republic of China are associated with risks resulting from the special legal, political and economic environment. The future political direction of the Chinese government is uncertain, there is the risk of negative performance due to government interventions and restrictions. The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse effect on the value of the bond. A more detailed description of risks and other general information can be found under "Risks" in the sales prospectus.

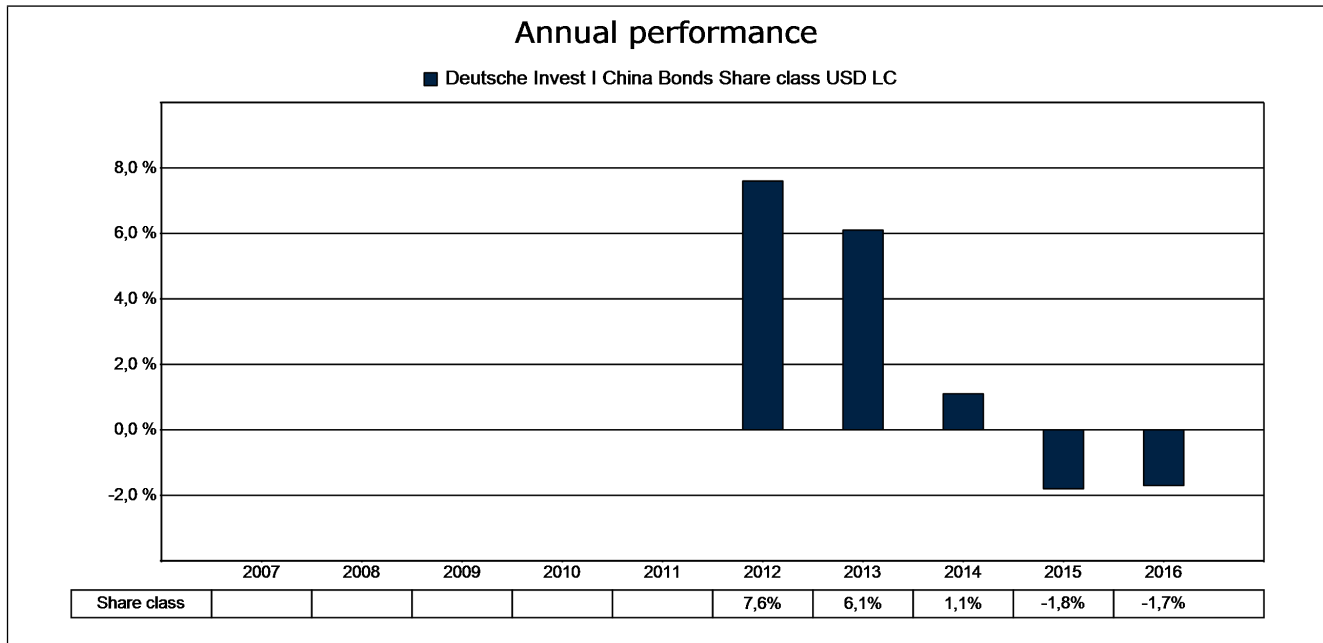

Charges

The costs and fees borne by you are used for the management, administration and custody of the fund, as well as for its distribution and marketing. These costs restrict the potential growth of your investment.
