

db x-trackers CSI300 UCITS ETF

Share Class: 1C (ISIN: LU0779800910), (WKN: DBX0M2), (Currency: USD)

a sub fund of db x-trackers. The Fund is managed by Deutsche Asset Management S.A., part of the Deutsche Bank Group.

Objectives & Investment Policy

The aim is for your investment to reflect the performance of the CSI300 Index (Index) which reflects the performance of shares of 300 companies listed on the Shanghai Stock Exchange and the Shenzhen Stock Exchange (China A Shares). The Index is calculated in RenMinBi (CNY). The shares are issued by companies which are selected on the basis that they have the largest combined value of readily available shares as compared to other companies on the stock exchanges. The Index is reviewed and may be adjusted every 6 months. The Index is

calculated on a price return basis, which means that the level of the Index does not include any dividends and distributions made by the companies.

To achieve the aim, the Fund will invest in transferable securities and enter into financial contracts (derivatives) with one or more swap counterparties relating to the transferable securities and the Index, in order to obtain the return on the Index.

No dividends will be paid on your shares.

You may redeem your investment on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 6 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund does not invest directly in the components of the Index and its returns will be dependent on the performance of the derivatives used.

The Fund may enter into one or more derivatives with one or more counterparties. If any of the counterparties fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

Deutsche Bank and its related companies may act in several roles in relation to the Fund such as distributor, derivative counterparty and management company which may involve conflicts of interest.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks (including market suspension risks) than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment.

Your investment is dependent on the performance of the Index less costs but your investment is not expected to match that performance precisely.

The derivative counterparty may reduce the payments under the swap agreement if the tax policies in China change. The reduction may result in a negative impact on the net asset value of the shares.

The Index is rules based and is not capable of being adjusted to take into account changing market circumstances. As a result you may be negatively affected by, or may not benefit from, the lack of such adjustments in changing market circumstances.

The derivative used to gain exposure to the Index may be adjusted to reflect certain expenses in relation to taxes and/or buying, selling, borrowing, financing or custody costs. These replication costs may result in the Fund and your investment suffering a loss.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.
